

ASMIK MIKAELIAN

Dubai, UAE | asmikaelyan@gmail.com | [LinkedIn](#) | [Portfolio](#)

Senior Product Designer with experience in FinTech, EdTech, SaaS, and complex B2B systems. I own projects end-to-end — from research and strategy to UI and delivery. I use AI across my workflow to speed up research, testing, and design. My developer background helps me work closely with engineers and ship faster. I focus on metrics, user research, and data to drive design decisions.

EXPERIENCE

Senior Product Designer | Netology Jan 2025 – Aug 2026

B2C EdTech platform for professional growth · 1.5M+ users · 130K graduates

- Grew activation by 17% on a subscription video platform by redesigning the onboarding and content discovery flow
- Improved D7 retention from 21% to 40% by adding gamification features and an achievement dashboard
- Cut expert onboarding time by 50% by simplifying the profile setup from a multi-step form to a guided flow

Product Design Consultant | Startup | Vienna, Austria Sep 2024 – Jan 2025

B2B platform for building and managing immersive 3D virtual worlds in the browser

- Found 12+ UX dead ends and 32 growth opportunities by running a full platform audit and user research
- Improved social discovery by redesigning World Chat, Personal Chat, profile sharing, and onboarding flows

Senior Product Designer | Tickeron | San Francisco, USA Jul 2021 – Aug 2024

B2C AI-powered platform for retail investors with trading bots and predictive screeners

- Increased annual revenue by 2% by launching a targeted promotional campaign for new users
- Improved checkout completion by shortening the purchase flow from 8 steps to 4 steps
- Reduced mobile drop-off by 20% by redesigning key product flows and mobile experience
- Grew alert setups by 32% by simplifying the flow and clearly communicating the value to users

Middle Product Designer | MinePASS Sep 2019 – Jul 2020

B2B industrial platform for mining fleet dispatch and underground worker safety tracking

- Designed a real-time monitoring system used by 400+ workers, pulling data from 120+ sensors
- Built the alarm flow so operators could identify and respond to active alerts within seconds
- Created the design system from scratch — reusable components and patterns for a complex industrial UI

UX/UI Designer | SpetsTek Feb 2016 – Feb 2019

B2B enterprise asset management software for Gazprom, L'Oréal, Yokogawa

- Designed desktop and mobile interfaces for TRIM, an enterprise asset-management platform used by engineers and field technicians
- Built a maintenance system and mobile inspection app for L'Oréal's manufacturing plant
- Designed a mobile diagnostics tool for Yokogawa engineers for real-time equipment monitoring

EDUCATION

Bachelor's in Information Technology | ITMO University Sep 2012 – Jul 2016

SKILLS

Design: Figma, Sketch, Prototyping, Design Systems, Design Tokens, User Research, Usability Testing

Product: 0→1 Product Design, UX/UI, Information Architecture, Customer Journeys, A/B Testing, Data-driven Design

Technical: React, React Native, Front-End Development, AI Prototyping
